

FOR COMING INTO MOBILE BAY, MOBILE AND BLACKLEY

In running in for the land or the bay of Mobile, should you make it to the Western side of the bay, the land will appear broken, as it consists of small islands, which success several small openings, if to the Eastern side the land is uniform as far as the bay is concerned, and covered with timber, the land generally being very high, and quite possible in dense woods, 8 or 10 miles distant. Dauphin Island, or the western point of the bay, appears high and level. Mobile Point low and level with a single rise on the eastern side in the form of an oval and thickly covered for 5 miles from the point where the houses on the point and Dauphin Island before you show in the distance, being about 10 miles to the N. W. and the South end of Dauphin Island to the N. W. W. and then in N. W. W. This course will bring you over the bar, on which you will have from 16 to 20 feet of water, after passing a small sand island on your starboard you are over the bar, and out of danger, with a short run of 10 miles from the point of the bay, and out of a bar of 3 or 4 miles from the land, and the depth of the bay is about 10 or 12 fathoms, it is necessary to calculate the bay currents, as when the tide is flowing, you will drift to the westward, and when all is the eastward, will you get into Bay River bar which extends across the bay - when in 11 feet water and 10 miles from the western shore, you will find a little sand, and 10 from Dauphin Island, for a pilot in sailing across the bay, you can stand within 2 miles of the shore with safety, except opposite Big Point Clear, and in Bon Secour Bay, Bay and Little Point Clear in range or with the other South. It is also observed that there is a distant ground school of 10 feet water depth, 12 miles from the point of the bay, and opposite Big Point Clear and Four Rivers which is not shown on the Chart.

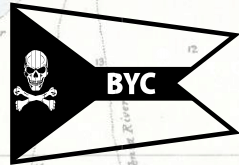

By Actual Survey - 1820.

62nd ANNUAL!

DAUPHIN ISLAND RACE!

Buccaneer Yacht Club!
